Radiology Report - X-ray Right Knee (AP, Lateral, Skyline)

Patient: Zainab Bello **Age/Sex:** 53 / F **Date:** 06 Oct 2026

Referring physician: Dr. Funmilayo Adeyemi, Orthopaedics

Findings

- Severe narrowing of the medial tibiofemoral joint space with bone-on-bone contact.
- Marginal osteophytes at the medial and lateral compartments and patellofemoral joint.
- Subchondral sclerosis and cyst formation in the medial tibial plateau.
- Mild varus alignment (approx. 8 degrees). No fracture or loose body.

Impression

Advanced (Kellgren-Lawrence grade 4) osteoarthritis of the right knee. Orthopaedic review for total knee arthroplasty is recommended.

Reported by: Dr. Kelechi Nwosu, MBBS, FWACS (Radiology)
